On the Yartstick, the history of painting in the last 2000 years is depicted in 58 selected images. The art represents a mixture of world famous as well as lesser known motifs, bringing together the most important themes, techniques and styles. The time line of artwork spans the centuries: from Roman funeral art and mosaics through works of Islamic, Chinese and Mayan art, into the Renaissance and on to the Modern.

On one side of the Yartstick folding rule are the images. On the flip side, the individual works of art are referenced into their historical context. This side lists the period and artist, the title of the work, technique used, the country of creation and the location of the work.
